

Press Release

Press release: EVUM Motors at the Sinntal Advent market – power supply from the future for a good cause

Munich, 18 December 2024 - On 14 December, it was that time again: the living Advent calendar in the Sinntal opened its door – and behind it was not only lights and delicacies, but also the future of mobility. EVUM Motors was on site with two electric vehicles to provide the entire power supply for mulled wine boilers, waffle irons and festive lighting.

With an impressive 95% battery capacity at the start, EVUM's two vehicles reliably provided energy until midnight. At the end of the evening, the battery level was still around 70%. A real highlight for the 70 or so visitors who gathered in a festive mood at the village community square.

The best thing about the successful event: the proceeds of the evening will be donated to the 'Rappelkiste' kindergarten in Sterbfritz – a contribution to supporting the little ones in the region.

A perfect example of how modern e-mobility not only makes everyday life easier, but also brings real added value to the community. EVUM Motors – always one step ahead.

About EVUM Motors:

EVUM Motors is a leading provider of zero-emission commercial vehicles 'Made in Germany'. With a focus on sustainability and cost-effectiveness, the company is driving the mobility transition and helping cities, municipalities and companies to achieve their environmental and cost targets.
